CALIFORNIA GROWN PECANS

CITRUS, TROPICAL, DECIDUOUS
FRUIT TREES - ORNAMENTALS
GRAPE VINES, SMALL FRUITS, ROSES

1926

Hobbs-Gregg Nurseries, Inc.

Salesyard: Bonita Avenue

SAN DIMAS LOS ANGELES COUNTY CALIFORNIA

Things to be Observed

Terms—State specifically the size and variety of trees you want, and give a few general hints as to your soil and climatic conditions. From unknown parties we demand a remittance or deposit of 50% of order or good references. Send money by bank draft, postoffice or express order, or registered letter.

Quality of Stock—All of our trees are grown to stakes, and are straight and thrifty, and well rooted. "He who plants trees, plants for generations"—hence, in choosing stock be careful to get only the best obtainable.

Packing—We pack all trees in the best possible manner, in bales and boxes, according to the size of order and distance of shipment. Trees can be sent with safety to any part of the United States or foreign countries.

Guaranteeing Trees—We guarantee all trees shipped from our nurseries to be as represented. We personally attend to the budding of all our trees, and use the utmost care to insure them true to name.

Transportation Facilities—Our transportation facilities are excellent, being within easy access to the Southern Pacific, Santa Fe and Pacific Electric.

Shipping Instructions—Please furnish explicit directions for shipping and by what route. In the absence of any instructions we ship according to our best judgment, but in no case do we assume any responsibility for condition or safe delivery of trees after same have been properly packed and delivered to transportation companies.

Claims—Legitimate claims for errors and mishaps will be promptly recognized if made within ten days of the receipt of the goods, otherwise we will entertain no claims of this nature.

Combination Citrus Trees

Budded to Five Varieties

Two-year-old stock, balled, 60 to 75 lbs.....each, \$5.00

The Citrus Fruits

Oranges

Washington Navel. The standard early orange for commercial planting in California. Tree of moderate growth, nearly thornless and an early and regular bearer. Fruit large, free from rag and seedless. Possesses a flavor peculiarly its own. An excellent shipper. Ripens from December to February.

YOUNG NAVEL TREE

Valencia Late. The leading variety for summer shipping. Its lateness in ripening and the fact that it will remain on the tree in perfect condition until late Fall makes it a most popular variety for commercial planting. The Valencia Late and Washington Navel are the two varieties most extensively planted in California and make it possible to pick and ship ripe oranges every day in the year.

Thomson Improved Navel. Evidently a sport from the Washington Navel. Fruit similar to the Washington, but the peel is more smooth. Its outward appearance is more attractive than the Washington but contains more rag and does not possess so good a flavor. Season, last of November to February.

Navelencia. Resembles the Thomson Improved Navel in appearance and quality. Supposed to combine the flavor and quality of the Navel with the late ripening of the Valencia Late. Season, January to June.

Paper Rind St. Michael. Fruit rather small, very solid and heavy, peel very thin, has an abundance of juice. A good shipper. Tree a strong upright grower and a good bearer. Season, April to June.

GRAPE FRUIT

Ruby Blood. Tree a good grower, nearly thornless and very prolific. Fruit of medium size, peel, thin, flesh a ruby red showing through the peel when fully ripe. Season, February to April.

Malta Blood. Ripens about the close of the Navel season. Tree of slow but persistent upright growth; a heavy bearer. Fruit oval and almost seedless; has a peculiar refreshing flavor. When ripe the pulp is splashed with crimson streaks, sometimes almost solid crimson.

Joppa. Tree similar in growth and appearance to the Valencia, excepting that it is thornless, and very prolific. Fruit medium to large, of good quality and flavor; practically seedless. Season, April to July.

Standard Kid Glove Oranges

Dancy Tangerine. A favorite for commercial planting. Tree a strong upright grower and a heavy bearer. Fruit medium size, flattened and very highly colored. Flesh dark orange. Very juicy. Season, February to May.

Willow Leaved Mandarin. Tree very ornamental, a thrifty grower and good bearer. Fruit medium size, flattened, deep yellow, skin thin, flesh dark orange yellow, spicy and aromatic. Season, January to April.

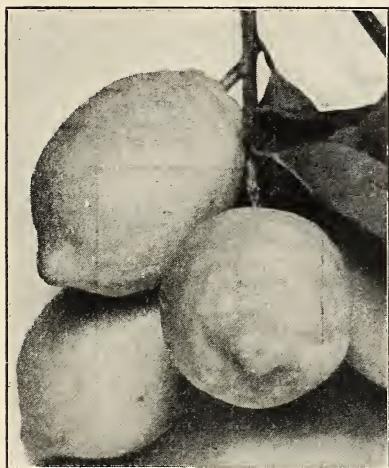

Satsuma (Oonshiu). Tree thornless and of dwarf habit; never attains large size. Fruit medium, flattened, not so highly colored as the Tangerine, but deeper yellow than the Mandarin. Excellent flavor and entirely seedless. The earliest orange to ripen. Season, November to March.

Pomelos

Marsh Seedless. The favorite variety for commercial planting in California. Tree a strong vigorous grower and heavy bearer. Fruit medium and practically seedless. Quality good. Season, January to July. Being planted extensively in the Imperial and Coachella Valleys, and Arizona.

Lemons

Eureka. The most extensively planted variety in California. Tree a good grower and prolific bearer, blooming and setting fruit every month in the year, nearly thornless. Fruit medium to large, peel smooth and of good texture. Abundant juice and little pulp. One of the best commercial varieties.

EUREKA LEMON

Lisbon. Tree an upright grower, thorny, very vigorous, a good bearer. Fruit of the best quality and nearly seedless. Considered superior to any other lemon by many growers.

Standard Varieties of Limes

Tahiti (Bearss Seedless). Tree of good shape and fairly vigorous. Fruit about the size of a small lemon, very thin peel, abundance of juice of the true Lime flavor. Seedless.

Mexican. Tree rather a slow grower, quite thorny and very tender. Should not be planted in cold locations. Fruit small, peel smooth and thin, full of juice of excellent Lime flavor.

Plant Hobb-Gregg Citrus trees for quality and production.

Kumquats

KUMQUAT

Kumquat. The tree has a dwarf bushy habit and usually attains a height of 8 to 10 feet when mature. Very ornamental for yard or tub planting. An enormous bearer and retains its golden yellow fruit for months which adds to its beauty. Fruit about an inch long and egg shaped. Peel (which is edible), smooth, aromatic and spicy to the taste. The entire fruit can be eaten or preserved in sugar and is quite delicious.

New and Rare Varieties

Algerian Tangerine. A recent introduction from Algiers. Tree a compact upright grower, quite ornamental and very prolific. Fruit similar to the Dancy Tangerine, but matures much earlier.

Lue Gim Gong. A late introduction from Florida, said to be superior to the Vanencia Late.

Sweet Lemon. Unlike the ordinary lemon, this variety contains less acid and more sugar, giving it an agreeable sweet flavor. Rough and coarse but full of juice of excellent quality. Tree inclined to be of dwarf habit and quite thorny. Very prolific; having bloom and fruit of all sizes the year around. A desirable variety for home use but of no commercial value.

Vanilla Orange. Tree a strong upright grower and quite prolific. Fruit medium size, round and has a distinct vanilla flavor when thoroughly ripe.

Ponderosa Lemon. Fruit very large, Sweet Lime. Very much like the Sweet Lemon excepting that it has the lime flavor. Tree very tender and should be planted only in warm localities.

Citron of Commerce. Tree of dwarf habit and irregular growth, somewhat susceptible to frost. Blossoms and sets fruit through-

out the year. Fruit large and lemon shaped. Peel very thick from which the citron of commerce is manufactured.

Sampson Tangelo. A hybrid of recent introduction, being a cross between a Tangerine and a Pomelo. Tree a vigorous upright grower and quite productive. Fruit of medium size, peel smooth and thin. Flavor slightly sub-acid, somewhat sweeter than the Pomelo.

All Trees are offered subject to prior sale and an advance in prices.

Tropical Fruit Trees

The enthusiasm shown by California plantmen in the culture of tropical fruits, particularly the Avacado, has prompted us to add the propagation of Avacados and some of the other more important varieties of tropical fruit trees to our Nursery busi-

ness. It will be our aim to give the growing and handling of this line of stock the same careful attention that has made our Citrus Trees so well and favorably known throughout the citrus planting districts of the world.

Avocados (*Persea Gratissima*)

***Puebla.** Tree very rapid grower, erect with drooping branches, very prolific. Fruit obovate in shape and weight 10 to 12 ounces. Skin nearly smooth and a dark purple. Flesh yellow and has a rich flavor. Ripens November to January.

***Fuerte.** Tree vigorous grower. Fruit pyriform, weight 12 to 14 ounces. Skin smooth and green in color; carries a high percentage of oil and is of good flavor. Ripens from January to April. One of the leading varieties for commercial planting.

***Spinks.** Tree a precocious and prolific bearer. Fruit obovate to pyriform in shape. Weight, 16 to 20 ounces. Skin roughened and purplish black in color. Flesh cream colored and a rich flavor. Ripens March to October.

***Dickinson.** Tree a vigorous grower and very prolific. Fruit oval to obovate. Weight, 7 to 12 ounces. Skin very rough, dark purplish with large maroon colored dots. Flesh a pale greenish yellow and has a pleasant flavor. Ripens May to September.

***Sharpless.** Tree a strong grower, inclined to become tall and slender, but a very good producer. Fruit pyriform, rather elongated. Weight, 16 to 24 ounces. Skin slightly pitted or roughened and of a dark maroon color. Flesh cream colored and of unusually pleasant flavor. Ripens from September to January.

Dickey A. A new Guatemalan variety of great promise. Fruit nearly spherically, average weight 1 to 1½ lbs., brownish purple in color. Flesh fine and buttery, with a very rich flavor. Ripens February to May.

Dorothea. Tree vigorous, productive and fairly hardy. Blooms in April and May. Ripens in December and January. Fruit light green in color with many yellow spots. Skin leathery, flesh attractive yellow, of good texture, no fibre, and excellent quality. Weight 8 to 12 ounces; seed 1 to 1¼ ounces.

Queen. Tree vigorous and of a spreading habit, very productive. Fruit oblong pyriform. Weight, 1½ pounds. Skin rough and deep purple in color. Flesh yellowish in color, and has a very rich nutty flavor. Ripens early summer.

Taft. Tree a rapid grower of spreading habit. Fruit Obovate to Pyriform. Weight 16 ounces. Skin somewhat rough and green in color. Flesh cream colored and of excellent flavor.

Tiger. Tree an upright grower and has borne well. Fruit weighs from 10 to 16 ounces, and matures from January onward; pear shaped; skin rough; purple color; flesh clear light yellow; excellent flavor. Originated at Highland and stands the hot dry air of the interior better than the Guatemalan varieties growing near it.

AVOCADO TREE

Linda. Tree vigorous and hardy and a good producer. Fruit round, weighing about 2 pounds. Skin rough and a deep purple in color. Flesh yellowish and has a rich nutty flavor. Ripens October to May.

Lyon. For early and prolific bearing the Lyon has no superior; fruit large, usually 16 to 18 ounces; shape broadly conical; flavor rich and nutty; quality excellent; skin thick, dark green. The tree comes into bearing usually the second or third year. April to August.

The Lyon tree does not develop as other varieties, hence a separate price is made.

Price for Lyon, field or box grown:

	Each	Per 10	Per 100
3 to 4 feet.....	\$5.00	\$45.00	\$400.00
4 to 5 feet.....	6.00	55.00	500.00

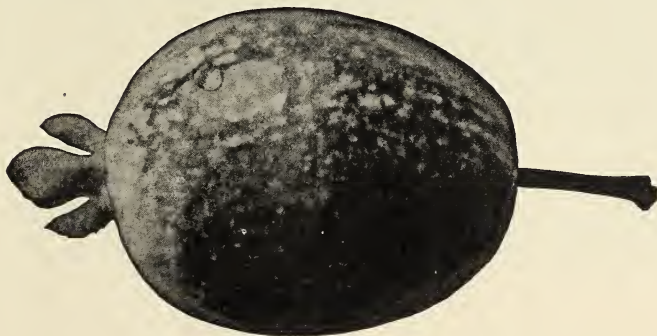

Mexican Thin Skinned Varieties

Ganter. Medium size, form oval to oblong; skin thin, of greenish color; flavor and quality excellent; tree vigorous, uniform and one of the most dependable bearers, fruit early; desirable for home use in interior sections. October to December.

Northrop. Tree extremely hardy, vigorous and prolific. Fruit pear shaped; weight 8 to 10 ounces; quality good. Skin thin and of purplish color. Bears two crops a year; the main crop ripening from October to December and a lighter crop from April to June.

FEIJOA. SELLOWIANA

Feijoas

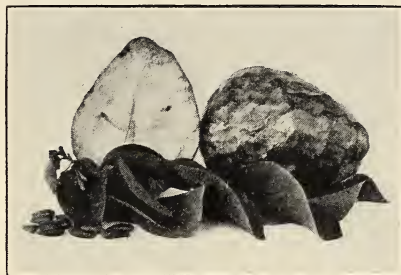

Feijoa Sellowiana. An attractive shrub growing to a height of about 8 feet. The leaves are a glossy green with a silvery white beneath, and if kept pruned makes a very compact and striking shrub. Has a showy and attractive flower. The fruit of the better varieties is about the size of a large hen's egg, and its delicious flavor reminds one of a combination of pineapple and bananas. Very hardy and of easy

Combination Avocado Trees

Budded to grow three varieties. For home planting, where space is limited, these trees afford a variety of fruit over practically the entire year. Price, balled 2-year stock, each \$10.00.

Choice of Combination Varieties:

Puebla, Fuerte, Spinks, Dickenson, Lyon. Queen, Ganter, Blake, Northrup.
X Mexicola and Caliente.

CHERIMOYA

Cherimoya

Anona Cherimoya (Custard Apple). Tree grows to a fair size with a well-shaped top. Fruit can be eaten out of hand or as a table delicacy, pulp being of a custard-like consistency. A delicious sub-tropical fruit that should be in everyone's garden. Delicious. A fine variety originating at Hollywood on the grounds of Mr. C. F. Wagner. Fruit large, weighing up to 1½ pounds. Ripens in January. Budded trees, \$3.00 each.

culture. Fruit ripens in the Fall. As seedlings do not always come true to type, we carry only the grafted trees, the scions having been taken from the best and largest fruiting specimens. Fine bushy plants, \$1.50 each. Extra size, \$2.50 each. Special price on quantities.

Choiceana. An oblong variety of large size and excellent quality.

Superba. A round fruit of good size and quality.

Sapota

Casimoroa Edulis (White Sapota). A strong growing tree of rather spreading habit. Attains a height of 15 to 20 feet. Has large five-fingered leaves. It thrives well in all the milder sections of California. The fruit is about the size and shape of a quince. It has a thin skin and the pulp has a melting peach-like flavor, very sweet and delicious. Balled trees budded from best varieties, 2 to 3 feet, \$2.50 each.

Chapman. A very fine variety of this delicious fruit originating at Lomita. The fruit is round, slightly ribbed and very large, averaging 4 inches in diameter, with a yellowish green skin and a creamy white, melting interior. The flavor is delightful. Ripens September to January. Growing in 6x6 in. boxes, budded \$2.50.

Loquats

Trees valuable for their fruit and as ornamental features of the garden. Season, February-May.

	Each	Per 10	
Seedlings, 2 to 3 feet....	\$1.25	\$10.00
Seedlings, 3 to 4 feet....	1.50	12.50

Guavas

Strawberry Guava. Fruit about the size of large strawberries, and round, and a deep reddish brown color. Very desirable

as a table fruit or for jams and jellies. Strong potted plants, 50c each. \$4.00 per ten.

Yellow Strawberry Guava. Fruit larger than the red variety and yellow in color. Potted plants, 50c each; \$4.00 per ten.

Combination Citrus Trees

In the interest of home orchards and the pleasure of amateur horticulturists we bud a few standard citrus trees to not less than five varieties of fruit, as follows: Washington Navel and Valencia Late Oranges, Marsh Seedless Pomelo, Eureka Lemon, and one of the following (as the customer may choose): Dancy Tangerine, Willow-leaved Mandarin, King Mandarin, or a Ruby Blood. These trees are of standard size, the buds well established in the field. Thrifty, well shaped trees, carefully balled and ready for immediate planting, we are offering for \$5.00 each, F. O. B. at railway or express office.

Orchard Planting

We are always pleased to consult with our patrons with reference to the soils and climate of their particular locality as regards their adaptability for the growing of the different varieties of fruit trees, also methods of planting, irrigation, cultivation, fertilization, etc., and whenever necessary or possible for us to do so we will be glad to personally look over their properties.

Deciduous Fruit Trees

In the listing of deciduous fruit trees, it has been our aim to only include those varieties that possess merit and do well under prevailing conditions of soil and climate in

Southern California. All of our trees are carefully grown, true to name, free from insects and disease, and in every way dependable.

Apples

	Each	Per 10	Per 100
4 to 6 feet.....	\$.50	\$4.00	\$30.00
3 to 4 feet.....	.40	3.00	25.00

Five or more of a variety at the ten rate; 50 or more at the hundred rate.

Arkansas Black. Season, November-December; quality market and shipping. Fruit roundish and uniform; skin maroon; flesh fine, firm and crisp, juicy and of good flavor.

Delicious. Season, November-December; quality shipping and general market. Fruit long and tapering; skin thin and tough, yellow in color splashed with red; flesh white, fine grained, sweetly acid and possessed of a pleasant aroma.

N. W. Greening. Season, November; quality market, shipping and storage. Fruit large, round and variable in size and form; skin smooth, pale yellow, with faint blush; flesh yellow, crisp, firm, juicy, and mildly sub-acid.

Early Harvest. Season, July; quality home use and local market. Fruit medium in size and roundish; skin smooth and straw yellow in color; flesh white, juicy, crisp, good sub-acid flavor.

ARKANSAS BLACK

Gravenstein. Season, August; quality market, shipping and culinary. Fruit uniform size, but of irregular shape; skin greenish color striped with red; flesh yellow, of good texture, crisp, juicy and tender.

Jonathan. Season, November; quality local market, shipping and culinary. Fruit medium size, roundish and oval; skin deep yellow overlaid with bright red; flesh faintly yellow, crisp, spicy, aromatic and sub-acid.

King David. Season, October; quality local market and table. Fruit large; skin quite red in color; flesh firm, crisp and juicy.

Red Astrachan. Season, July; quality home use and local market. Fruit medium size, roundish and flat; skin greenish yellow striped with carmine; flesh fine grained, tender, crisp, with a pleasant sub acid flavor.

JONATHAN

Red June. Season, July; quality home use and early market. Fruit medium in size, but somewhat irregular in shape; skin deep crimson, giving it a brilliant appearance; flesh white, tender, of a rich sub-acid flavor.

Rhode Island Greening. Season, October; quality market, table and cooking. Fruit large and uniform in size and shape; skin greenish turning to yellow; flesh yellow, firm, juicy and fine quality.

Rome Beauty. Season, November; quality shipping, storage and market. Fruit roundish to slightly oblong; skin greenish-yellow mottled with red; flesh white, fine grained, juicy and of a pleasant sub-acid flavor.

Stayman Winesap. Season, December; quality market, table and culinary. Fruit medium to large and somewhat flattened at base; skin yellow splashed with red; flesh greenish yellow, firm, juicy, with a decidedly tart flavor.

White Astrachan. Season, July; quality market and local shipping. Fruit large, roundish and flat at ends; skin deep yellow with faint streaks of red; flesh white and acid, making it desirable for cooking.

WHITE WINTER PEARMAIN

White Winter Pearmain. Season, November; quality shipping and market. Fruit medium to large, roundish oblong; skin smooth, greenish in color, turning to a pale yellow covered with russet dots; flesh firm, fine grained, tender, crisp, juicy.

Winter Banana. Season, October; quality table and market. Fruit large size, roundish to conical, sometimes flat at the base; skin smooth, moderately thick and yellow in color; flesh whitish tinged with yellow, mild and sub-acid in flavor, crisp and tender.

Yellow Bellflower. Season, October; quality market, shipping and home use. Fruit large and more or less ribbed; skin yellow, suffused with red; flesh whitish, fine grained, tender and juicy.

Yellow Newtown Pippin. Season, December; quality storage and shipping. Fruit roundish, oblate and somewhat angular; skin rather tough, greenish in color covered with russet dots; flesh of yellow tinge, firm, tender, fine grained and sub-acid.

Crabapples

On Japanese Pear Root

Bartlett. Season, August; quality market, shipping, canning and drying. Fruit large and regular in shape; skin bright yellow with blush on the sunny side; flesh fine grained, white, buttery, juicy and decided pear flavor.

Beaurre Clairegeau. Season, September; quality canning, dessert and home use. Fruit inclined to be large at the blossom end, and tapering to the stem; skin yellow shaded with orange, suffused at times with russet; flesh yellowish, juicy, granular. with a good vinous flavor.

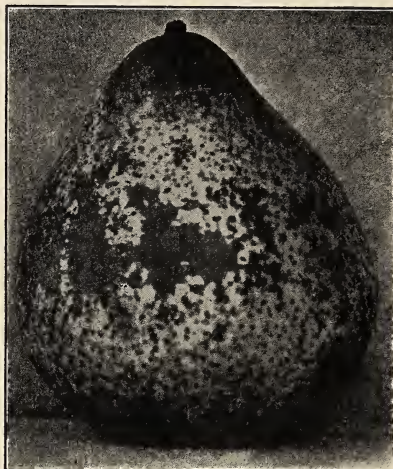

KIEFFER

Beurre Hardy. Season, September; quality market, shipping and home use. Fruit large and quite regular; skin cinnamon russet, sometimes with red cheek; flesh melting and of good flavor.

Easter Beaurre. Season, October; quality shipping and home market. Fruit large to very large; skin yellowish-green more or less covered with russet dots; flesh white, fine grained, melting and sweet.

Kieffer. Season, October; quality local market and home use. Fruit large; skin yellow covered with small dots; flesh with a pronounced quince flavor, juicy and melting.

WINTER NELIS

P. Barry. Season, December; quality shipping and storage. Fruit large and elongated; skin golden yellow covered with russet; flesh juicy, fine grained and of good flavor.

Red Siberian. Fruit medium size, deep red blush, very high flavor. Stock scarce. Price, 75c.

Seckel. Season, August-September; quality local market and home use. Fruit small but regularly formed; skin brownish green with russet cheeks; flesh whitish, buttery, juicy and of a rich spicy flavor.

Winter Bartlett. Season, November; quality late market and shipping. Fruit much resembles the regular Bartlett; skin yellow and smooth with a blush on side exposed to the sun; flesh somewhat coarse but tender, juicy, melting and sweet.

Winter Nelis. Season, December; quality shipping and storage. Fruit medium size and of roundish formation; skin yellow covered with russet; flesh yellow, sweet and fine grained.

DWARF PEARS

Bartlett. Dwarf pears are desirable and especially adapted for small gardens or city lots. They are desirable for a filler in commercial orchards. They bear early, often the second year. Plant 8 to 10 ft. apart. Price, 4-6 ft, 75c; 10 trees, \$6.50; 100 trees, \$50.00.

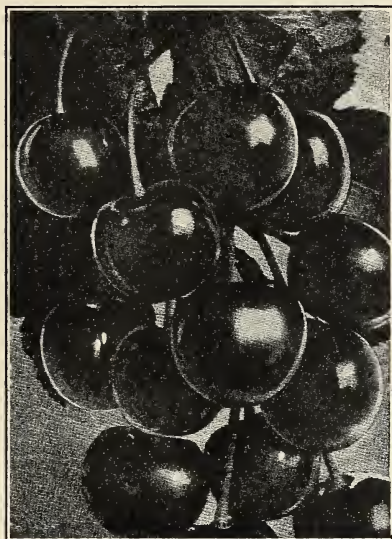

Cherries

Five or more of a variety at the ten rate;
50 or more at the hundred rate.

On Mazzard Root

Bing. Season, July; quality market and shipping. Fruit large and heart shaped; skin nearly black and of good texture; flesh firm, sweet, meaty, of fine flavor and purplish red in color.

BING CHERRY

Black Tartarian. Season, June; quality market and shipping. Fruit large and heart shaped; skin black and glossy; flesh reddish purple in color, of good flavor; pit rather small.

English Morello. Season, July; quality local market and culinary. Fruit round-cordate; skin dark red; flesh red, melting, sprightly tart and of good cooking quality.

Lambert Cherry. Large to very large, rich deep red color; flesh firm and of good quality; regular and heavy bearer; ripens after Bing.

Lewelling. Season, July; quality market and shipping. Fruit large, resembling Black Tartarian; skin a glossy black; flesh of good texture, firm, juicy and sweet.

Royal Ann. (Napoleon Bigarreau.) Season, late June; quality canning and preserving. Fruit rather long and heart-shaped; skin pale yellow to amber in color; flesh yellow, juicy and pleasantly sweet.

Plums

	Each	Per 10	Per 100
4 to 6 feet.....	\$.50	\$4.00	\$30.00
3 to 4 feet.....	.40	3.00	25.00

Five or more of a variety at the ten rate;
50 or more at the hundred rate.

On Peach Root

Beauty. Season, June; quality market and shipping. Fruit decidedly heart-shaped; skin crimson sprinkled with white dots; flesh amber color permeated with crimson, and of good flavor; pit rather small.

Burbank. Season, June-July; quality early market and home use. Fruit large egg-shaped; skin bright red slightly yellow mottled; flesh a rich yellow, juicy and sweet.

KELSEY PLUM

Climax. Season, June; quality shipping and local market. Fruit large and heart-shaped; skin thick and good protective quality, deep vermilion red in color; flesh yellow, juicy, and of good flavor.

Formosa. Season, July; quality market and home use. Fruit heart-shaped and of good and uniform size; skin cherry red with pale yellow blush; flesh firm, sweet, and of a delightful sub-acid flavor.

Kelsey Japan. Season, August-September; quality shipping and market, good keeper. Fruit very large and heart shaped; skin green, turning to yellow when fully ripe; flesh yellow, firm, juicy and of good vinous flavor—adheres slightly to the pit.

Santa Rosa. Season, July; quality shipping and local market. Fruit large and oval in shape; skin purplish crimson in color with a pale yellow bloom; flesh mottled and streaked with crimson, juicy and of a decidedly rich plum flavor.

On Myrobolan Root

Cherry. Season, June-July; quality market and home use. Fruit medium in size; skin bright red; flesh juicy and sub-acid.

Damson. Season, September; quality preserving, jellies, etc. Fruit rather small and oval in shape; skin purple with a thick blue bloom; flesh tart, and separates readily from the pit.

Duarte. Season, July-August; quality local market and home use. Fruit of medium skin deep blood red; flesh firm, of good flavor and quality.

Green Gage. Season, August; quality market and home use. Fruit of medium size and oval; skin greenish-yellow in color, and marbled with red; flesh pale green, juicy, melting, of good flavor and free from the pit.

Jefferson. Season, July-August; quality canning and market. Fruit large and oval, narrowed on one side; skin golden yellow with beautiful red cheek covered with white bloom; flesh rich and juicy and of a delightful flavor.

Satsuma. Season, August; quality culinary and local market. Fruit large and almost round in shape; skin a deep red; flesh firm, red in color, juicy and good flavor; pit small.

WICKSON PLUM

Wickson. Season, August; quality good keeping and shipping. Fruit symmetrical, large and heart-shaped; skin cherry red to a deep scarlet in color; flesh amber, firm, sugary and of good flavor; pit small.

Wildgoose. Season, July; quality shipping and home use. Fruit oval and of average size; skin tough, color bright red with thin bloom; flesh tender, melting, sprightly and refreshing.

Yellow Egg. Season, July-August; quality canning and market. Fruit very large and egg-shaped; skin yellow with a sprinkling of white dots covered with a shade of white bloom; flesh yellow and rather acid, but sweet when fruit is fully ripe.

Prunes

50 or more at the hundred rate.			

Alexander. Season, July; quality local market and home use. Fruit medium to large and of uniform size; skin greenish white partly covered with red; flesh white, of good grain, juicy and palatable.

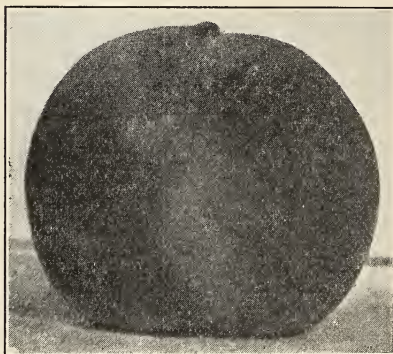

Briggs Red May. Season, June; quality early market and table. Fruit medium to large; skin greenish white with red cheek; flesh greenish-white, melting and juicy.

Buckhorn. Season, August; quality local market and home use. Fruit of large size; skin creamy white with red cheek; flesh white but reddish at the pit, from which it separates readily.

Champion. Season, July-August; quality local market and table. Fruit of good type and quite large; skin shell white with red cheek; flesh of good texture, rich flavored and juicy.

Early Japanese. Season, early May; early market and home use. Fruit roundish oblong; skin yellow with bright red cheek; flesh yellow veering to red at the pit.

George IV. Season, July; quality local market and home use. Fruit large and round; skin creamy white with red blush; flesh quite pale, juicy, abundant and of a delightful flavor.

J. H. HALE PEACH

Elberta. Season, July; quality market, shipping, drying and canning. Fruit large and round; skin golden yellow striped with red; flesh yellow, juicy and sweet.

Foster. Season, July, quality canning, drying and shipping. Fruit very large and uniform in size; skin deep orange red, dark red on sunny side; flesh yellow, rich, juicy with a sub-acid flavor.

Early Crawford. Tree vigorous and prolific; in past years this was the earliest peach, but now much earlier kinds are grown. Large; flesh yellow and juicy; a fine peach of its season for home orchards. Late July.

Hales Early. Season, July; quality early market and home use. Fruit round and large; skin greenish white with red cheek; flesh white, melting, juicy and sweet,—adheres somewhat to the pit.

Heath Cling. Season, August-September; quality canning, pickling and preserves. Fruit very large; skin creamy white tinged with red on the sunny side; flesh greenish white, tender, of good flavor and a pleasant aroma.

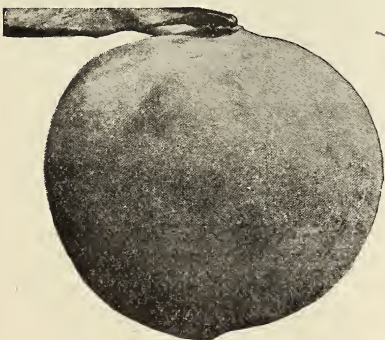

Imperial. Season, early June; quality local market and home use. Fruit of medium size and good shape; skin deep yellow with red cheek; flesh rich, firm and excellent flavor.

Indian Blood Cling. Season, September; quality preserving and pickling. Fruit of medium size; skin dark red clouded with purple; flesh a pronounced red.

J. H. Hale. Season, August; quality shipping, drying and table. Fruit regular, round with equal halves; skin yellow with red cheek; flesh yellow, fine grained, juicy and sweet.

Late Crawford. Season, August; quality shipping and drying. Fruit large and roundish; skin yellow with dark red cheek; flesh deep yellow, veering to red at the pit and of good flavor.

Lemon Cling. Season, August-September; quality canning. Fruit lemon shaped and of good size; skin yellow suffused with cherry red; flesh firm, yellow, veering to red at the pit, flavor sprightly, vinous and sub-acid.

PHILIP'S CLING PEACH

Lovell. Season, August-September; quality canning, drying and shipping. Fruit nearly perfectly round and uniform in size; skin yellow; flesh yellow to the pit, firm, of fine flavor and quality.

Lemkins Honey. Season, late July; quality local market and home use. Fruit oval and of medium size; skin whitish yellow with red blush on sunny side; flesh creamy white, sweet and juicy with a pronounced honey flavor.

Mayflower. Season, May; quality local market and home use. Fruit medium to large in size; skin a light green suffused with red; flesh creamy white, fine grained, sweet and delicious.

Miller's Late. Season, November; quality local market and home use. Fruit large and round; skin creamy yellow; flesh firm, good in texture and of fine flavor.

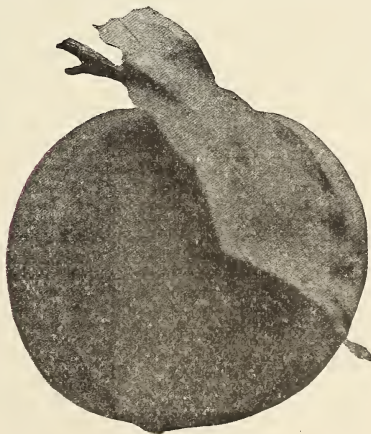

Muir. Season, July; quality drying, canning and shipping. Fruit large; skin a pronounced yellow; flesh yellow to the pit, firm, juicy and sweet.

MILLER'S LATE PEACH

New Year's Greeting. (Winter Freestone.) Season, November-December; local market and table. Fruit round and of medium size; skin greenish white; flesh white, of good substance and flavor, with small pit.

Orange Cling. Season, late August; quality home canning and local market. Fruit very large and good shape; skin yellow with red blush on sunny side; flesh golden yellow, juicy, of good flavor and sugary.

LOVELL PEACH

Palora Cling. Season, early August; quality canning. Fruit large and even and of good type; skin clear yellow with a faint pink blush; flesh a fine texture, firm, and even in color.

Peak Cling. Season, August; quality canning. Fruit similar to Phillips' Cling; skin slightly colored; flesh a clear yellow to the pit, which is small.

RED BIRD CLING PEACH

Phillips Cling. Season, August-September; quality canning. Fruit large and of uniform size; skin a pronounced yellow with bright red tinge on sunny side; flesh firm, fine grained, excellent flavor and evenly yellow to the pit.

Red Bird Cling. New, snow white with distinct scarlet cheeks and markings. The most beautiful of the early peaches. Always in great demand on the market, late May and early June.

Saucer. Season, June, quality table and home use. Fruit medium in size and flattened at both ends; skin white with crimson cheek; flesh white, firm, sweet, of excellent quality and flavor.

Sneed. Season, late May, early June; quality shipping, local market, and home use. Fruit medium size, roundish oval; skin creamy white with red cheek; flesh white, juicy, melting, and fine flavor with a tendency to cling to pit.

Strawberry Cling. (McKevitts.) Season, August; quality local market and home use. Fruit large to medium; skin pale yellow with red markings; flesh white, veering to red at the pit, juicy and highly flavored.

Strawberry Free. Season, July, quality dessert, local market, and home use. Fruit large, broadly oval; skin creamy white shaded purplish red; flesh white veering to red at the pit, juicy, sub-acid, melting.

Stump of the World. An old Southern favorite. Very light yellow with bright red cheek; flesh white, tender and juicy; fruit grows to a very large size; freestone, unexcelled for home use and local market. Season, late July.

White Heath Cling. Creamy white with blush on sunny side; flesh white, veering to red at the pit; tender, juicy and delicious. Season, late September.

Tuscan Cling. Season, July-August; quality canning and shipping. Fruit round and large; skin yellow flushed with pink; flesh evenly yellow to the pit, firm and of excellent flavor.

Blenheim. Season, middle June; quality canning and drying. Fruit oval shaped and large; skin deep orange in color; flesh a clear yellow, firm, juicy and fine flavor.

Hemskirke. Season, June-July; quality local market and home use. Fruit large, but somewhat flat on both sides; skin orange color with red cheek when fully ripe; flesh same color, tender and juicy with a plum-like flavor.

Moorpark. Season, July; quality canning, drying and market. Fruit extra large; skin greenish-yellow suffused with brownish red; flesh firm, juicy and fine flavor, parting freely from the pit.

MOORPARK APRICOT

Newcastle Early. Season, May; quality early market and home use. Fruit medium size and round in shape; skin pale orange; flesh orange color and of good flavor.

Royal. Season, June; quality canning, drying and shipping. Fruit large, roundish oval, somewhat compressed; skin deep yellow flushed with red; flesh moderately yellow, firm, abundant juice and of good flavor.

ROYAL APRICOT

Tilton. Season, June; quality canning, drying and market. Fruit large and somewhat flat in shape; skin decidedly orange in color; flesh deep yellow, firm and of a pronounced apricot flavor.

PLUMCOT

Apex. A true hybrid between the plum and apricot. A valuable new fruit. We

offer only the one variety. Ripens later part of June. Beautiful yellow, red cheek, wonderful flavor resembles both plum and apricot. Strong grower, good bearer, beautiful foliage. Price 4-6 ft trees, 75c; 10 trees, \$6.50.

Drakes Seedling. Blooming period early April. Nut of medium size and roundish in shape; shell medium soft and cream color; kernel short and plump and of good color, doubles being not uncommon.

I. X. L. DIAMOND

I. X. L. Blooming period middle March. Nut large and easily hulled; shell soft and smooth and of good color without bleaching; kernel large and plump.

Ne Plus Ultra. Blooming period middle of March. Nut long and narrow but of good size; shell soft and hulls freely; kernel large, sweet and highly flavored.

Nonpareil. Blooming period latter part of March. Nut large, long and narrow; shell thin and of good color; kernel long, filling the shell completely, and of excellent flavor.

Texas Prolific. Blooming period last of March. Nut of medium size and good shape; shell soft and light colored; kernel short, plump and sweet.

Eureka. Nut large and elongated in shape; shell soft, thin and smooth; kernel of good color, plump and good flavor.

Klondyke. Nut extremely large; shell medium soft; kernel large, and of good flavor. Tree admirable for home planting.

Placentia. Nut large and uniform in size; shell smooth and thin; kernel white, sweet, plump and fine flavor.

Payne. Nut large, pointed, uniform in size, shell well sealed and full, meat white. The heaviest producer of all the walnuts known. Tree somewhat slow in growth, owing to its heavy peeling habits. Undoubtedly the best variety to plant at this time. Price 25¢ per tree higher than other varieties.

STUART PECAN

SUCCESS PECAN

Pecans

From the production records of the few old pecan trees at different locations throughout California and Arizona and the performance of the young budded paper-shell pecan trees, every indication points to the Pecan as having a very large part in our future nut production of the west. The improved paper-shell pecan holds first place and commands the highest prices of all the nuts grown. Pecan nuts are in demand constantly, at high prices for confection and table use, because it is the richest in nutriment of all nuts.

Our stock this year is unusually fine. We have the following varieties to offer:

Schley. Considered by many to be the best all round pecan; nut large well filled, thin shell, early and prolific bearer.

Stuart. Nut large, often from 1½ to 2

inches long and oblong in shape; shell medium thin and of a light brown color; kernel bright colored, full, and of a rich nutty flavor.

Success. A strong rapid grower, an early and prolific bearer of large thin shell nuts. This is the variety most generally planted at Yuma.

Bradley. Large size, thin shell nut. A very early and prolific bearer; quality the very best; has taken more first prizes on account of quality of meat than any other pecan nut.

Big Z. The largest pecan nut in general planting; very early and prolific bearer of well filled nuts, weighing 38 to 40 per pound. Tree grows more rapid than other varieties.

Alicante Bouschet. Season, September; quality wine making. Fruit medium in size; skin black; flesh high in sugar content, giving a superior, pleasant, bright red wine.

Black Cornichon. Season, October; quality shipping and table. Fruit long and olive-shaped; skin thick, dark purple when ripe covered with a fine bloom; flesh firm and of good flavor.

Black Monukka. (Seedless.) Season, August; quality shipping, market and home use. Fruit of even size and about one-third larger than Thompson Seedless; skin dark red to black when fully ripe; flesh abundant, sweetly acidulous, tender and cracking.

Concord. Season, August; quality table, shipping and for grape juice. Fruit large and round; skin glossy black covered with bloom; flesh sweet, pulpy, tender and a delightful musky flavor; fine for jelly.

Emperor. Season, October; quality table and shipping. Fruit large and oblong in shape; skin thick and deep rose in color, covered with a light bloom; flesh crisp, abundant, juicy and of good flavor.

Flame Tokay. Season, September; quality shipping, market and table. Fruit large, bunches often weighing eight and nine pounds; skin red in color covered with a lilac bloom; flesh firm, juicy, abundant, and of fine flavor.

Gros Colman (Fresno Beauty). Season, October; quality table and shipping. Fruit extra large and bunches rather long and loose; skin of a dark blue color covered with a light blue bloom; flesh firm and of a pleasant vinous flavor.

Malga. Season, August; quality raisin, shipping and table. Fruit large, oval in shape, bunches often weighing ten pounds; skin thick with a yellowish-green color; flesh firm, crackling, juicy and sweetly acidulous.

CONCORD GRAPE

Red Malaga (Maraville de Malaga or Molinera). A new red shipping grape preferred to Tokay. Deeper red, shading to rich purplish blue, fine keeper. Brings highest prices in the East.

Mission. Season, September; quality wine and table. Fruit medium size and round in shape; skin purple-black; flesh sweet and delicious.

Muscat. Season, September; quality market and raisin. Fruit large, slightly oval, bunches large; skin pale amber when ripe covered with a thin white bloom; flesh firm, brittle, sweet and abundant.

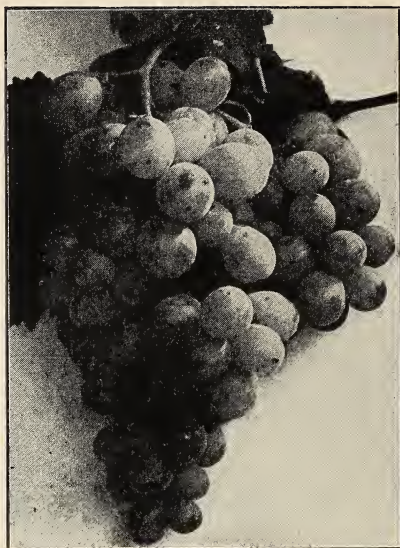

Zinfandel. Season, September; quality wine-making. Fruit round borne in compact bunches; skin dark purple covered with a heavy bloom; flesh abundant, juicy and of a good vinous flavor.

Rose of Peru (Black Prince). Season, October; quality table and home market. Fruit large and round, borne in large shouldered bunches; skin thick, brownish black; flesh tender, juicy and of a sprightly vinous flavor.

Sultana. Season, August; quality raisin. Fruit rather small and seedless borne in compact, long and tapering bunches; skin thin, green, almost transparent; flesh tender and tart to the taste.

Thompson Seedless. Season, August; quality raisin and table. Fruit oval in shape and seedless; skin greenish-yellow turning to bright yellow when fully ripe; flesh abundant and of good flavor.

Black Muscat. An excellent table grape; berries very large; skin well colored, thin but tough; flesh soft and juicy with delicate Muscat aroma. Decidedly the richest flavored of all the table grapes we grow. We recommend it especially for home gardens. August and September.

MUSCAT GRAPE

Small Fruits

Black Naples Currant. Highly esteemed for its large and beautiful fruit, which is highly esteemed for jellies; bush a good grower. Plants 50c each.

Perfection Currant. A comparatively new variety of good habit and growth; fruit large, bright red, ample flesh of a rich sub-acid flavor. Plants 50 cents each.

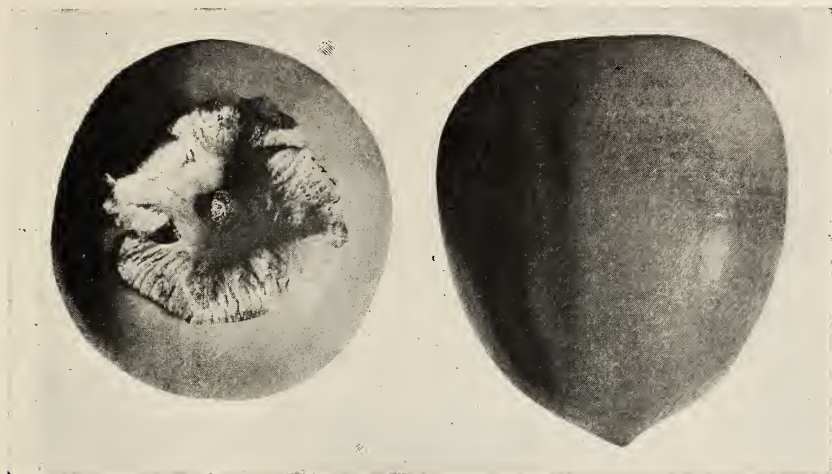

Cory's Thornless Blackberry. A recent introduction of sterling merit. Cones are literally without thorns, vigorous and rapid growers, attaining a length of twenty-five feet in a single season, and are of a trailing habit; foliage large, bright green and abundant; fruit large and long, of fine flavor and good market quality, nearly seedless. Plants 50 cents each; tips 25 cents each.

Crاندalls' Early Blackberry. An old standard variety, a good grower and cropper; fruit large, firm and of good flavor, ripens early. Plants 25 cents each.

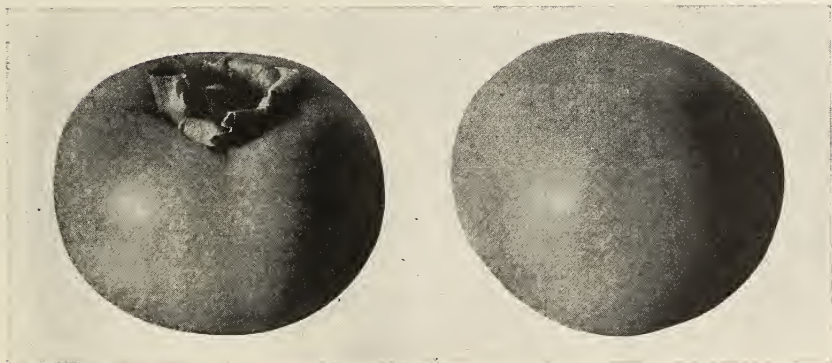

Cuthbert Raspberry. Standard variety valuable for market and shipping; fruit large, handsome, good color and fine flavor. Plants 25 cents each.

Gardena Dewberry. Popular wherever grown; bush of trailing habit and good bearer; fruit large, glossy black, and sweetly acidulous. Plants 25c each.

Loganberry. Trailing in habit and a strong grower, hence should be trellised; fruit dark red, large, and of a delightful sub-acid flavor; a good shipper. Plants 25c each.

HACHIYA PERSIMMON

FUYUGAKI PERSIMMON

Fuyugaki, 4 to 6 ft.....	2.00	18.50	175.00

Five or more of a variety at the ten rate;
50 or more at the hundred rate.

Fuyugaki (new). First introduced by the U. S. Department of Agriculture in 1913. Since then it has fruited in the Southern States and California where it has proven to be of exceptional value. Never being astringent, it may be peeled and eaten like an apple when still firm, though fully ripe. Keeps well and quality is of the best. Medium size, flattened; deep red. Tree very

prolific. Said by many to be the finest persimmon grown and it is predicted that it will surpass all others as a commercial variety.

Hachiya. Fruit large, often attaining a size of $3\frac{1}{2}$ to $3\frac{3}{4}$ inches, oblong in shape with a short point; skin a bright and pronounced red with darker blotches; flesh orange color.

Silong. Season October-November; quality home use, local market and shipping. Fruit large, roundish oblong, very pointed at the blossom end; skin good protective quality, smooth and a deep orange red color, of good substance, sweet and delicious.

Tamopan. Fruit somewhat flattened, with indented mark around the center larger and oblong; skin a golden yellow and of good substance; flesh abundant and of good flavor, red in color and astringent until fully ripe.

Roses

No garden is complete without its allotment of at least several varieties of roses; it is the one flower that stands supreme in our affections, hence its distinction as the "Queen of Flowers." Hardy under California conditions, responsive to ordinary care and attention, it is a conspicuous feature of home grounds, alike among rich and poor, the mansion and the cottage. Our assortment has been made with care, and covers the desirable sorts in late introductions as well as the old standard favorites. All

plants are field-grown, robust of habit and with a strong root development. With ordinary care they will bloom freely and grow well. Roses may be briefly differentiated as follows: Hybrid Tea, Tea, Hybrid Perpetual, Pernetiana, Polyantha, Noisette, Hybrid Sweet Briar, Moss, Cherokee, Irish Single, Miscellaneous. Following the name in the descriptions we have designated the class or group to which the variety belongs.  All our rose bushes are first grade budded stock, and must not be compared with the cheap plants that are being offered.

DUCHESS OF WELLINGTON

Bush Roses

American Beauty. Hybrid Perpetual. Flowers deep rose and of good substance and shape, sweet and fragrant; fine under glass, but does not do so well out of doors unless conditions are favorable. Price 75c each.

Black Prince. Hybrid Perpetual. Flowers globular and dark crimson in color, veering to black. Price 50c each.

Caroline Goodrich. Hybrid Perpetual. A vigorous grower; flowers light red, double, very fragrant. Price 50c each.

Columbia. Hybrid Tea. Flowers large, of good substance; color a gorgeous glowing pink. Price 75c each.

Constance. Pernetiana. Orange yellow, streaked with crimson in the bud; free bloomer and a favorite. Price 75c each.

Duchess of Wellington. Intense saffron yellow stained with crimson. As the flower ages it becomes a deep saffron yellow. Blooms fairly full. Buds long and pointed. Very free flowering. Exceedingly fragrant. Price 75c each.

Frau Karl Druschki. Hybrid Perpetual. Flowers large, of good shape and pure white in color; growth strong and vigorous with abundant foliage. Price 60c each.

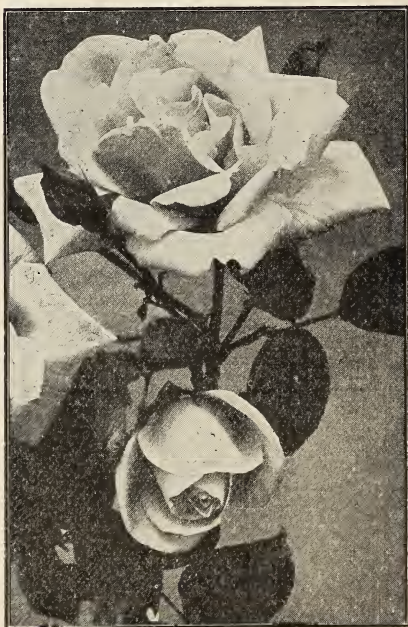

General MacArthur. Hybrid Tea. Very fragrant, buds and flowers bright crimson; plant robust and almost exempt from mildew. Price 60c each.

Golden Emblem. Hybrid Tea. A clear yellow, handsome in bud; strong stems; foliage glossy green. Price \$1.00 each.

Hadley. Hybrid Tea. Flowers a permanent deep crimson of good form and size. Price 75c each.

Hoosier Beauty. Hybrid Tea. Flowers large, flowers glowing crimson with deep shadings, buds long and slender. Price 75c each.

Irish Fireflake. An exquisite single rose that should be in every garden. Color, a deep maddery orange, splashed with crimson, deliciously and strongly perfumed. Vigorous in growth, constant in bloom. Price 75c each.

GOLDEN EMBLEM

Irish Elegance. Hybrid Tea. Flowers apricot color shaded with orange, buds very attractive; desirable for table decoration. Price 75c each.

Joseph Hill. Hybrid Tea. Flowers a good shade of salmon-pink, large in size and full and double. Price 75c each.

Isobel. Hybrid Tea. Flowers orange-scarlet with faint copper shadings, and quite fragrant. Price, 75c each.

Juliet. Pernetiana. Flowers large, fragrant, double, anterior petals old gold, interior rich rosy red. An exceptionally fine variety. Price 75c each.

Kaiserin Augusta Victoria. Hybrid Tea. A good white rose. Flowers large, double and of good form and substance. Price 60c each.

KAISERIN

Killarney. A vigorous hybrid tea rose with so many good points in its favor it has become a standard variety. Long, pointed buds of excellent shape. Color, bluish pink suffused with pale pink. Price 75c each.

Killarney Brilliant. A sport from the original Killarney rose. The color is a rich glowing shade of rosy carmine. Price 75c each.

Lady Alice Stanley. In color an exquisite shade of coral rose, the inside of the petals shading to flesh pink. Blossoms very large, exceedingly fragrant. A very desirable variety. Price 75c each.

Lady Hillingdon. Tea. Flowers a solid apricot yellow in color; growth strong and vigorous; foliage a violet green. Price 75c each.

La France. Hybrid Tea. Flowers large and pink suffused with a silvery blush; an old favorite. Price 60c each.

pink shaded with salmon; free bloomer and good grower. Price 75c each.

Mrs. Charles Russell. Hybrid Tea. Flowers carmine with scarlet centers and of handsome form and good substance. Price 75c each.

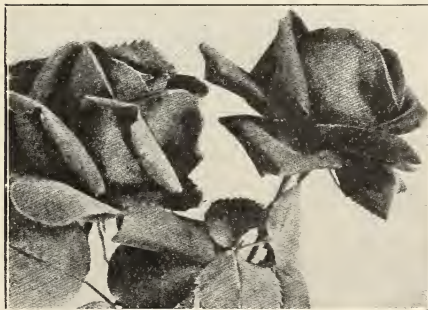

PAPA GONTIER

Mrs. George Shawyer. Hybrid Tea. Flowers approximately a solid rose pink, of large size and good form. Price 60c each.

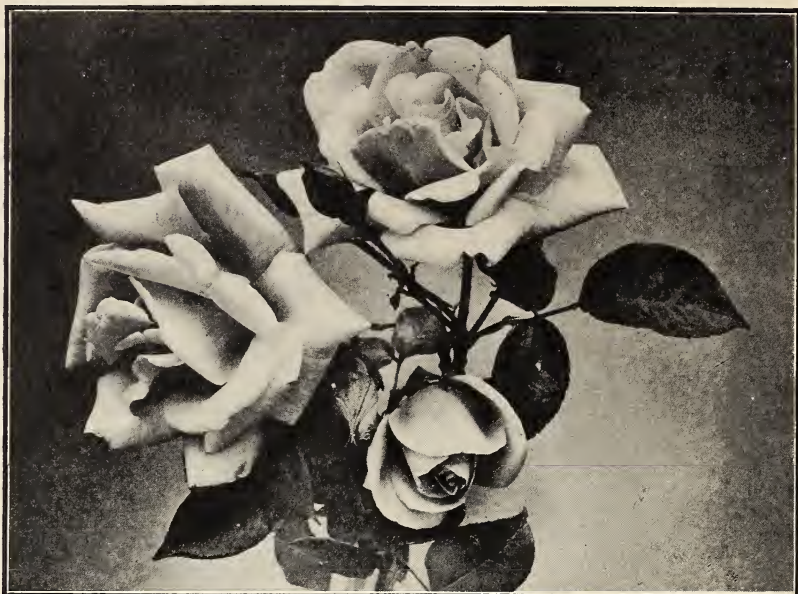

Ophelia. Hybrid Tea. Flowers and buds of good form. Color salmon flesh shaded with rose; stems long. Price 75c each.

Papa Gontier. Tea. A great favorite in California; plant a free bloomer; flowers rosy crimson with carmine center, moderately double; buds very attractive. Price 75c each.

Paul Neyron. Hybrid Perpetual. The largest rose known. Flowers a pronounced rose produced at the terminals of long stems; robust and free blooming. Price 60c each.

PAUL NEYRON

MRS. AARON WARD

Los Angeles. Hybrid Tea. A magnificent rose in vigor, color, form and fragrance. Flowers flame-pink, toned with coral shaded with gold; buds long and pointed. Price 75c each.

Mad. Leon Pain. Light silvery pink shaded with salmon. Growth exceedingly vigorous and produces large quantities of flowers throughout the entire season. We consider this an indispensable variety to any collection of roses. Price 75c each.

Miss Lolita Armour. Pernetiana. Flowers double and cup-shaped, color orange red shading to apricot and shell pink. Its color scheme is strikingly beautiful. Price \$1.00 each.

Mme Caroline Testout. Hybrid Tea. Official City Flower of Portland, Oregon. Flowers bright pink; a free bloomer and robust grower. Price 60c each.

Mme. Edouard Herriot. Pernetiana. Flowers medium and semi-double, reddish copper in color; a profuse and continuous bloomer. Price 75c each.

Mrs. Aaron Ward. Hybrid Tea. Flowers variable, from orange to pale yellow, but handsomely formed on long stems. Price 75c each.

Mrs. A. R. Waddell. Hybrid Tea. Flowers large, open and globular, in color pearly

Perle d'Or. Polyantha. Flowers golden yellow with orange center. Price 75c each.

Pink Maman Cochet. Tea. Buds long and pointed; flowers a deep rich pink in color; a good grower. Price 60c each.

Radiance. A rose of American origin, and to our mind one of the best varieties in cultivation today. Buds long and pointed, expanding to blooms of enormous size, similar in shape to Caroline Testout, but in color deep, rich rose pink. Price 75c each.

Red Radiance. A counterpart of the original pink variety, save color, which is a delightful shade of rich rosy red. Tremendously

vigorous grower and constant bloomer. Price 75c each.

Rose Marie. Buds long and pointed. Petals large and well rounded; the open bloom ideal as to form. One of the finest roses we know of for cut flower purposes. In color a delightful shade of pure, even rose pink. Price 75c each.

White Maman Cochet. Tea. Buds and flowers of good shape and substance, the latter being pure white, of large size and abundant supply. Price 60c each.

Premier. Hybrid Tea. Flowers of good size and form, large, and a deep pink in color, fragrant, and borne on stiff, thornless stems. Price 75c each.

Red Letter Day. Hybrid Tea. Flowers vivid scarlet and semi-double; plant a good grower and free bloomer. Price 75c each.

Richmond. Hybrid Tea. A free bloomer; flowers scarlet shaded with crimson and delightfully fragrant. Price 75c each.

Soliel d'Or. Pernetiana. Flowers golden yellow, shaded with nasturtium red, rather flat, but of good size; free blooming and hardy. Price 75c each.

Sunburst. Hybrid Tea. Flowers yellow, shaded coppery orange, large and of good form and substance. A great favorite among rosarians. Price 75c each.

Ulrich Brunner. Hybrid Perpetual. Flowers light cherry red veering to scarlet and produced abundantly on long stems; of vigorous habit. Price 60c each.

Wm. F. Dreer. Pernetiana. A late introduction of Fred H. Howard's. Flowers a beautiful color combination of shell pink, orange and golden yellow; buds long and pointed; a good grower. Price \$1.00 each.

Willowmere. Pernetiana. Flowers coral red suffused with carmine in the bud, when fully open assuming a shrimp pink. Price 75c each.

Climbing Roses

Climbing American Beauty. Miscellaneous. Flowers medium size, double, fragrant and a cerise red in color; a vigorous grower. Price 50c each.

Climbing Belle of Portugal. A desirable acquisition to the climbers. Flowers large and a delicate pink in color; buds long and of good shape; plant a vigorous grower. Price 75c each.

Climbing Hoosier Beauty. Hybrid Perpetual. Free bloomer and robust grower; flowers glowing crimson with deeper shadings. Price 75c each.

Climbing Lady Hillingdon. Flowers apricot yellow, of good form and texture; plant a robust grower. Price 75c each.

Climbing Mme. Caroline Testout. Hybrid Tea. A vigorous climber and free bloomer; flowers bright pink, identical with the bush Testout. Price 75c each.

Climbing Mme. Cecile Brunner. Hybrid Polyantha. A California introduction of real merit; flowers salmon pink, like the bush variety, which are produced in late spring. Price 75c each.

Climbing Papa Gontier. Tea. Free bloomer and robust grower; flowers rosy crimson with carmine center; desirable in any collection. Price 60c each.

Climbing Pink Maman Cachet. Tea. Flowers rose pink with bright center; strong grower. Price 60c each.

Climbing White Cherokee. A variety grown in great quantities throughout California and is invaluable for hiding unsightly barns, fences, etc. It produces great masses of waxy white single flowers with a conspicuous bunch of yellow stamens in the center. Foliage shining green and good at all times of the year. Price 75c each.

Climbing White Cochet. Tea. Flowers in form like the bush variety, in color pure white tinged with pink; growth vigorous. Price 60c each.

Climbing Marechal Neil. Noisette. Flowers full, beautifully formed, fragrant, and a deep golden yellow in color. Price 75c each.

Climbink Pink Cherokee. Pure pink in color; buds pointed; plant a rampant grower. Price 50c each.

Climbing Reine Marie Henriette. Hybrid Tea. Flowers large, cherry red in color, fragrant and abundant. An old climbing variety. Price 60c each.

Climbing Sunburst. Hybrid Tea. One of the good new roses. Flowers sulphur yellow; buds long and handsome, rendering it a great favorite. Price 75c each.

Climbing Tausenschoen. Polyantha. Thornless, does not mildew. Flowers pink shaded with rosy carmine. An old and popular variety. Price 60c each.

Cone Bearing Evergreen Trees

CEDRUS

Perhaps the most beautiful class of tall evergreens. All of these are remarkably hardy, easily grown, and distinct form in outline.

C. Atlantica. (Mount Atlas Cedar.) Dark green, erect, rather stiff habit, very pleasing shape, fine for lawn specimens. Balled, 1½ to 2 feet, \$1.25 per foot.

C. Deodara. (Himalayan Cedar.) The most popular conifer. Silvery blue foliage; very fast growing and quite drought resistant. Balled, 2 to 4 feet, \$1.00 per foot.

CHAMAECYPARIS

C. Lawsoniana. (Lawson Cypress.) Broad, oval, pyramidal tree, of soft gray color, and graceful outline; hardy, except in dry interior; a fine tree for lawn and specimen planting. Balled, 2 to 3 feet, \$2.00 each; in gallon cans, 1½ to 3 feet, 75c each.

C. Lawsoniana alumi. (Blue Lawson Cypress.) Beautiful soft blue foliage; very compact, upright growth. The most popular of the small conifers. Balled, 1½ to 2 feet, \$1.25 per foot.

C. Lawsoniana Fraseri. An excellent variety of Lawson cypress from France; very similar to the above, but of a lighter color. Balled, 1 to 1½ feet, \$1.25 per foot.

C. Lawsoniana Pendula. (Weeping Cypress.) A beautiful tree for specimen planting. Has graceful pendulous branches with silver green foliage. Balled, 4 to 5 feet, \$3.00; 3 to 4 feet, \$2.00.

CUPRESSUS

Cypress. Exceedingly hardy, very fast growing and drought resistant.

C. Arizona. (Arizona Cypress.) A beautiful bluish green cypress of narrow, pyramidal form from the mountains of Arizona; a beautiful, ornamental tree adapted

to the hot, dry section of the interior. Balled, 5 to 6 feet, \$1.75 each; 4 to 5 feet, \$1.50 each; gallon cans, 50c each.

GROUP OF CONIFERS

C. Macrocarpa. (Monterey Cypress.) The well-known native California cypress, widely planted and used for hedge, shade trees and wind breaks. Gallon cans, 50c each.

C. Lusitanica. (Blue Cypress.) A rapid growing tree of spreading habit, with soft feathery blue foliage. Grows about 50 feet. Gallon cans, 2 to 3 feet, 75c each.

C. Sempervirens. (Italian Cypress.) A tall, slender tree with erect branches, having a pillar or columnar effect, fast growing and hardy. Our stock is of the extreme slender type, grown from cuttings. Balled, 3 to 6 feet, 50c per foot.

CEDRUS DEODARA

PICEA (Spruce)

P. Excelsa. Norway Spruce.) Hardy, strong growing, upright blackish green foliage, very compact while young in Southern California. Balled, 1 to 2 feet, \$1.25 per foot.

P. Pungens Glauca. (Colorado Blue Spruce.) Stiff, short needles and branches. Two types, a gray green and a glaucous blue; very slow growing in Southern California. Balled, 1 to 2 feet, \$1.50 per foot.

PINUS (Pines)

P. Canariensis. (Canary Island Pine.) Grows to 18 feet in height; the most beautiful of all pines, extremely long leaves are gathered in large tufts over the tree. The new growth is silvery white, fast growing. Balled, 1 to 4 feet, 75c per foot.

P. Mughus. (Dwarf Mountain Pine.) Very dwarf, compact, irregular growth. For rockery, tubs and dwarf planting. Balled, 1 to 1½ feet, \$2.00 each.

SEQUOIA

S. Gigantea. (California Big Tree.) The largest and oldest of all trees. These handsome trees are of perfect, symmetrical form, with thickly furnished branches and foliage of grayish green, grows quite rapidly. Balled, 2 to 5 feet, \$1.00 per foot.

S. Sempervirens. (Coast Redwood.) The well known California redwood are among the largest and most picturesque trees known. Fast growing, upright, tapering, drooping branches, very attractive in groups of from 2 to 5 and planted close together; very hardy. Gallon cans, 2 to 3 feet, \$1.00 each.

CRYPTOMERIA (Japanese Cedar)

C. Elegans. Elegant, Japanese Cedar, low tree or shrub of dense growth; foliage bluish green, changing to bronze in winter. Balled, 1½ to 2 feet, \$1.50 each.

JUNIPERUS. Junipers

The Junipers comprise a splendid collection of small trees. The growth varies from upright to spreading and trailing habit.

J. Chinensis. (Chinese Juniper.) Compact, dense, silver gray, short needle-like foliage. Balled, 1½ to 4 feet, \$1.25 per foot.

J. Chinensis Albo-variegated. (Variegated Chinese Juniper.) A very symmetrical, compact variety of upright, conical form. The bluish-green foliage is tipped profusely with creamy white branches. Does not sun burn. Attains an ultimate height of 4 to 5 feet. Balled, 1½ to 3 feet, \$1.25 per foot.

LAWSON CYPRESS

J. Horizontalis. Spreading on the ground like a watermelon vine; flat, green foliage, slender branching growth; fine for bank and border planting. Balled, 1 to 2 feet, \$1.00 per foot.

J. Hibernica. (Irish Juniper.) Upright, slender, compact growth; silver-gray foliage, sharp needles. Widely used, very hardy. Balled, 2 to 4 feet, 75c per foot.

J. Japonica. (Japanese Juniper.) Upright slender growth, with pendulous tips, branching into a beautiful spreading form; soft silver-gray foliage. Grows 6 to 10 feet. Balled, 1½ to 3 feet, \$1.00 per foot.

J. Pfitberiana. (Spreading Juniper.) A new Juniper of a very graceful habit of growth, rather low growing with spreading branches; foliage sage-green. Balled, 18 to 30 in., \$2.00 to \$3.50 each.

J. Rigidus. (Rigid Juniper.) Heavy needled form, bronzy gray color, upright habit, fast growing, very hardy. Balled, 2 to 3 feet, \$2.00 each.

J. Sabina. (Sabin Juniper *Tamariscifolia*.) One of the best of the low growing Junipers, average height about 2 feet with a spread of 6 to 12 feet when fully grown. Forms a dense, compact mat of gray-green foliage. Does not sun burn. Balled, 2 to 3 feet spread, \$1.25 per foot.

J. Scopulorum. (Silver-gray Juniper.) A narrow pyramidal, dense growing Juniper with a beautiful silver-gray color. A vigorous grower. Balled, 3 to 5 feet, 75c per foot.

THUYA (Arborvitae)

T. Orientalis. (Chinese Arborvitae.) Of compact, bushy habit, a medium sized conifer; foliage bright green. Balled, 3 to 5 feet, \$2.00 each; gallon cans, 1½ to 2 feet, 75c each.

T. Orientalis Aurea Nana. (Berkman's Dwarf Ever-Growing Arborvitae.) Of dwarf habit, compact and symmetrical, the branchlets are flattened, the tips of which retain their golden tint throughout the year. The most widely planted of the small conifers. Balled, bushy plants, 1 to 1½ feet, \$1.50 each; 1½ to 2 feet, \$2.50 each.

T. Bonita. (Dwarf Green.) Similar to *Aurea Nana*, but bright green compact. 1 to 1½ feet, \$1.50 each; 1½ to 2 feet, \$2.50 each.

T. Texana Glauca. Slender, erect, columnar, soft, blue foliage, fast growing. Balled, 2 to 3 feet, \$2.00 each.

T. Occidentalis Lutea. (Peabody's Golden Arborvitae.) A distinct, golden type, rather slender in habit, reaching 12 to 15 feet with a diameter of 2 to 2½ feet. Such an abundance of golden color is seldom borne upon a single tree. Like all arborvitae, it can be trimmed and maintained at any size wanted. Balled, 1 to 2 feet, \$1.50 per foot.

T. Biota Orientalis Elegantisissima. This is one of the newer Arborvitae, compact, columnar, 7 to 8 feet. Brighter than Berkman's. Very scarce. Balled, 2 to 3 feet, \$1.25 per foot.

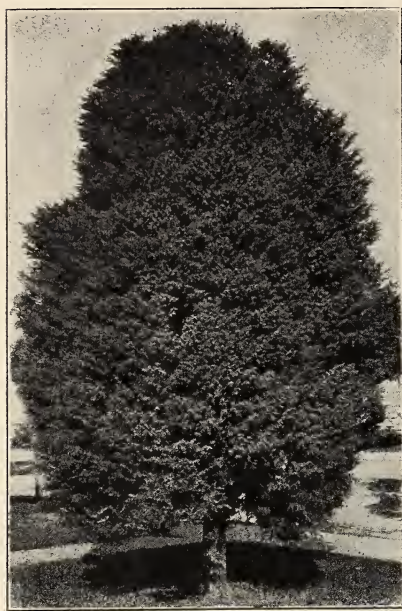

SEQUOIA GIGANTEA
California Big Tree

CONE BEARING TREES

Our Cone Bearing Trees are free from pests and are especially hardy. Do well in dry location.

Broad Leaved Evergreen Trees

CAMPHOR TREE

Acacia Baileyana. The favorite flowering Acacia. Deep silvery-blue fern-like foliage with a wealth of fluffy, canary-yellow flowers in February and March. Very fast growing. Gallon cans, 2 to 3 feet, 50c each.

Acacia Floribunda. (Ever Blooming Acacia.) Fast growing, round headed tree, small yellow flowers, blooms all summer. One of the best varieties of Acacia. Gallon cans, 3 to 4 feet, 50c each.

Camphora. (Camphor Tree.) One of the very best street and shade trees, of spreading, round form, dense, compact, foliage. Gallon cans, 2 to 3 feet, 50c each.

Carob. (St. John's Bread.) Admirably adapted for street and specimen planting; dark green foliage; shaped like an umbrella tree; very hardy for drought. Gallon cans, 3 to 4 feet, 65c each; 4' to 6 feet, 75c each.

Casuraina Stricta. (Beefwood or She Oak.) Slender, graceful upright tree, resembling a pine, very fast growing and exceedingly hardy, resisting drought, cold and heat. Gallon cans, 3 to 5 feet, 50c each.

Eucalyptus Ficifolia. (Scarlet flowering gum.) The most beautiful of all the eucalyptus. Dark, glossy leaves, compact, bushy tree, grows to about 20 feet in height, great clusters of brilliant blossoms ranging from pink through all the reds and scarlet to crimson. It is impossible to tell the exact color before they bloom. Gallon cans, 2 feet, 75c; 3 feet, \$1.00.

Broad Leaved Evergreen Shrubs

Abelia Grandiflora. One of the prettiest shrubs. Its arching stems are clothed with dark, glossy evergreen leaves, small, fragrant, tube-like flowers, shaded a light rose on the outside and white inside, are borne nearly every month of the year. Gallon containers, 75c each.

Arbutilón. (Flowering Maple.) A large shrub, or small tree, with maple-shaped leaves, blossoms almost continuous, with large bell-shaped brilliant flowers. Gallon cans, 2 to 3 feet, 75c.

Berberis Aquifolium. (Mahonia Aquifolium.) Commonly known as Oregon Grape. A handsome, ornamental shrub with dark, lustrous, spiny toothed green leaves, changing to a coppery red during winter. Yellow flowers in dense clusters, during the spring followed by purple berries, very hardy. Balled, 2 to 2½ feet, \$1.50.

Buxus. (Boxwood.) Japonica Japanese Boxwood. Leaves round, larger than other boxwood and of a glossier, lighter yellow green. Faster growing than English boxwood. Can be trimmed to any form desired. Gallon cans, 10 to 12 in., 50c.

Carissa Grandiflora. (Natal Plum.) One of the very best bushy shrubs, round leaves, glossy, black-green; white jasmine-like flower, small red fruit, resembles cranberries, which stay on the tree a long time after ripening. Gallon cans, 75c.

Coronilla Glauca. Shrub 3 to 4 feet; blue-green pea-shaped leaves and yellow pea-shaped flowers in small clusters cover the plant completely from late December to May. One of the hardiest low growing winter blooming shrubs. Balled, 1½ to 2 feet, \$1.25.

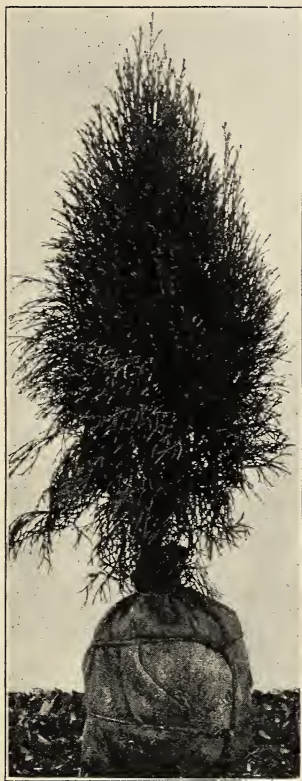

Cotoneaster. A fast growing hardy group of berried plants of various forms of growth and foliages, without thorns, very useful for shrubbery and for massing for fall effects.

C. Buxifolia. Bushy, erect, growth 4 to 6 feet; dark green, rather small, round leaves, large individual berries. Balled, 1½ to 2 feet, \$1.00 each.

C. Horizontalis. One of the best trailing shrubs, growing flat on the ground; leaves very small, dark green; bears great quantities of small, bright red berries, producing a beautiful effect. Half deciduous. Balled, 1½ to 2 feet, \$1.00 each.

C. Panosa. Silver Leafed Cotoneaster. Probably the most valuable of all cotoneaster; fast growing, attaining 8 feet; upright but graceful, small, white flowers in cluster, followed by brilliant crimson berries at every leaf joint. Balled, 3 to 4 feet, \$1.50; gallon cans, 50c.

C. Franchetti. Spreading, drooping shrub, 5 to 6 feet, medium to large leaves, dark green bronzy, silver reverse. Pinkish-white flowers, followed by well scattered orange red berries of good size. Balled, 2 feet, \$1.25.

WEEPING ARBORVITAE

Diosma Alba. (Breath of Heaven.) Fine leaves, heather-like foliage; dense, round, compact form, rather slow and dwarf. Dainty white flowers. Combines well with *Ericas*. Balled, bushy plants, 1 to 1½ feet, \$1.25.

ERICA (Heather)

The heathers are among the most beautiful of the flowering shrubs, and in groups and masses, or even in single specimens, lend a striking appearance to any planting. Most of the heathers bloom in the winter when other flowers are scarce, but by planting several varieties, a succession of bloom may be had throughout the year.

E. Carnea. Low, dense, round shape, with erect branches 2½ to 3 feet, flowers May and June, lavender pink, in small round clusters near tip of branches. Fine for growing in front of taller plants. Very hardy. Balled, 1½ to 2 feet, \$1.50.

E. Codonodes Veitchii. (Spanish Heather.) A new pure white heather, so covered with bloom from February to April as to resemble snow. A strong, vigorous grower doing well under a wide range of climatic conditions. Balled, 2 to 3 feet, \$1.50.

E. Mediterranea. (Mediterranean Heather.) A compact bush with handsome foliage with bright flowers, blooms in the late Spring from March to June. Balled, bushy plants, 2 to 3 feet, \$1.50.

E. Mediterranea Hybrid. Dwarf compact, grows only 1 to 2 feet; very dense, completely covered with bright, purplish lavender flowers in mid-winter. Balled, 12 to 15 in., \$1.50.

E. Melanthera. The best known and most widely planted of all the heathers, fast growing, 6 to 7 feet; fine, delicate foliage, but exceptionally hardy. Blooms in November and December; delicate pinkish lilac with black eye; blossoms completely cover the plant and remain in good condition for several months. A fine, Christmas plant. Balled, 15 to 18 in., \$1.50.

E. Persoluta Alba. A very bushy, compact shrub, completely covered during the blooming season from February to May, with small bell-shaped, pinkish-white flowers; a low growing plant of striking appearance. Balled, 2 to 3 feet, \$1.75.

EUONYMOUS

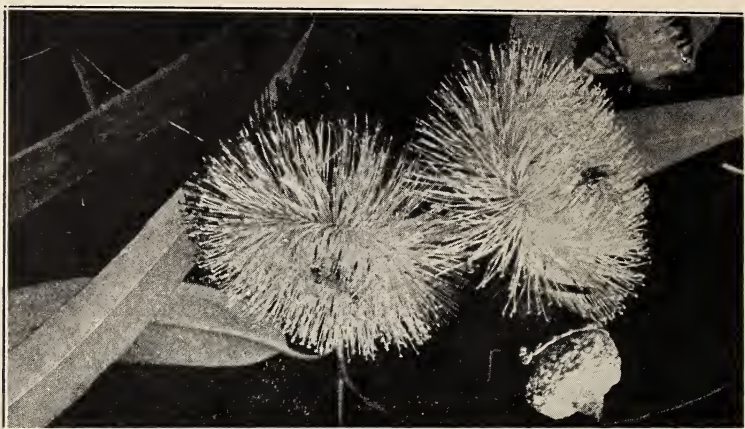

E. Japonica. A group of extremely hardy, bushy and compact shrubs, of moderate growth, with thick, heavy, leathery leaves, which has developed many variations of form and foliage; stands heat and cold.

E. Japonica Erecta Viridis. Green, upright, compact, erect branches, columnar form, small, bright green leaves. Good for formal planting. Can be trimmed to any form desired. Balled, 2 feet, \$1.00.

MAPLE

E. Japonica Alba Marginated. (White Edged.) Upright, columnar habit, fast and hardy, leaves with broad, creamy marginated band. Balled, 18 to 24 in., \$1.25; cans, 1 foot, 50c.

RED FLOWERING GUM

E. Japonica argenta marginated. (Silver Edged.) Leaves are edged and marked with white, of upright growth, 8 to 10 feet, fast and hardy. Balled, $1\frac{1}{2}$ to 2 feet, \$1.25.

E. Japonica Aurea Marginata. (Gold Edged.) Broad, bright, golden edge, entire plant rich golden color; very compact. Splendid for specimens and tub plants. Balled, $1\frac{1}{2}$ to 2 feet, \$1.50; cans, 1 foot,

E. Japonica Aurea Maculata. (Golden Variegated.) Leaves round, golden, spotted center, dark green edges, of strong robust habit. Balled, $1\frac{1}{2}$ to 2 feet, \$1.50; gallon cans, 50c.

E. Japonica Radicans Alba Marginated. This type spreads on the ground. Very desirable for bank and border plants. Balled, 1 foot, \$1.00 each.

Genista Fragens. (Canary Island Broom.) A delightful spring flowering shrub with small grass-green leaves, which is covered for several weeks with many pea-like yellow flowers. Makes a very beautiful specimen. Balled, 2 to 3 feet, \$1.00.

Hypericum-Moserianum. (Gold Flower.) Spreading, drooping habit, 2 to 3 feet, blue-green foliage, good for borders; flowers flat, 2 in. in diameter, bright golden yellow; April to June. Balled, 2 to 3 feet, \$1.25.

Lantana. Drought resistant, sun-loving plant, blooms continuously, tall growing, reaches 6 to 12 feet, in a variety of colors. Cans, 8 to 15 in., 40c.

Laurocerasus Officinalis. (English Laurel.) Heavy, dense, shrub, grows 6 to 8 feet. Very large, smooth, dark green leaves. Used for heavy hedges, specimens, or tub plants. Balled, $1\frac{1}{2}$ to 2 feet, \$1.50.

Leptospermum Laevigatum. (Australian Tea Tree.) Graceful, arching habit, growing 10 to 12 feet; foliage grayish-green, covered in the spring with a profusion of small, white flowers, grows rapidly and produces a quick effect. Balled, 2 feet, \$1.25; gallon cans, 12 to 18 in., 50c.

Ligustrum. (Privet.) Largely used for hedges, but many varieties are equally good as individual shrubs. Hardy as to drought, heat and cold.

L. Nepalense. (Nepal Privet.) Small leaves, sometimes called English Privet; grows 3 to 8 feet, bears spikes of fragrant, white flowers followed by clusters of shiny, black berries. Gallon cans, 35c.

L. Japonica. (Japanese Privet.) Grows to 12 feet. A large shrub or small tree, with leathery, dark green glossy leaves and white flowers. Useful for tall hedges and single specimens. Cans, 2 to 3 feet, 40c.

OREGON GRAPE

CAROLINA POPLAR

L. Lacidium. (Waxed-leaf Privet.) 4 to 6 feet; large dark green, waxy leaves; produces large clusters of white, lilac shaped blossoms; very fragrant, desirable for hedge or individual planting. Balled, 3 to 4 feet, \$1.50.

Melaleuca. (Bottle Brush.) Hardy Australian shrubs, fast growing and drought resisting. Should be largely planted in dry, hot location.

Melaleuca Amarillis Alba. Flowers white, 3 in.; long slender needle-like foliage, light green, graceful upright growth. Balled, 2 to 3 feet, \$1.25.

Melaleuca Erectifolia. Very slender growth, 10 to 12 feet; minute short leaves, small creamy spikes. Balled, 2 to 3 feet, \$1.25.

Melaleuca Decussata. Similar to the Erectifolia, but foliage more dense and bluish green. Gracefully drooping habit; flower spikes; lavender. Balled, 2 to 3 feet, \$1.25.

Myrtus Communis. (Sweet or English Myrtle.) One of our very best small leaved shrubs for hedge or specimen. Exceedingly hardy. Very compact, bright green foliage, small white flowers in late spring. Balled, 15 to 18 in., \$1.00.

Nandina Domestica. Japanese leafy shrub, growing 5 to 7 feet; resembles a compact, dwarf bamboo in general appearance, foliage tipped pink and bronze. Desirable for tubs, always attractive for landscape. Balled, bushy plants, 2 feet, \$1.50.

Osmanthus Fragens. (Sweet Olive.) Upright, slow growth, 5 to 7 feet; dark leathery leaves; fine fringe like flowers close to the branches; exceptional fragrance. Balled, 1 to 1½ feet, \$2.50.

Pittosporum. These are among our hardiest and most desirable shrubs; compact habit, various forms, quick and vigorous growth.

P. Eugenoides. Erect, symmetrical growth to 15 feet. A large shrub with glossy light green foliage, extensively used for specimen plants; quite hardy and rapid grower. Gallon cans, 1 to 1½ feet, 60c.

P. Tenuifolium. (Nigricans.) 10 to 15 feet. Shrub or small tree of symmetrical, compact growth, dark green foliage, excellent for large hedge or screen or individual plant. Gallon cans, 50c each.

P. Tobira. (Japanese Pittosporum.) Spreading, massive from ground up, round leaves, very dark, glossy and attractive. Terminating as rosettes at the end of branches where fragrant flowers appear in the spring. Exceedingly hardy. Balled, 1½ to 2 feet, \$1.50.

P. Tobira Variegatum. A variegated form of the above. The foliage is variegated with white which gives it a conspicuous and pleasing appearance. Very desirable. Balled, 1 to 1½ feet, \$1.25.

Pyracantha. (Evergreen Hawthorne.) Evergreen shrub with glossy foliage and showy winter berries; exceeding hardy and valuable.

P. Lelandi. Large leaved, 6 to 10 feet, fast growing, white flowers in May, orange colored berries, good sized clusters, October and November. Balled, 2 to 3 feet, \$1.25.

P. Yunnanensis. A recent introduction from China. Round leaves of a spreading habit, vigorous growth to 6 or 8 feet; berries large, very showy, orange to scarlet, fine for mass planting, banks and ground cover. Balled, 2 to 3 feet, \$1.25; gallon cans, 75c.

Veronica Decussata. A low growing, bushy plant used for borders and low, foreground shrubbery; has smooth dark green foliage, and during most of the year bears short spikes of reddish purple flowers near the tip of the branches. Balled, 1 to 1½ feet, \$1.25.

V. Traversii. Long, narrow foliage, upright, bushy shrub. Balled, 1 to 1½ feet, \$1.25.

Viburnum Tinus. (Laurestinus.) Well known winter flowering shrub, bearing in profusion clusters of small, flesh colored blooms, good subjects for single garden specimens and for ornamental hedge. Balled, 2 to 3 feet, \$1.25.

V. Sandankwa. (Or Suspensa.) A bushy, spreading shrub with slender, angled branches and large leaves, shiny and dark green above and pale beneath, flowers in clusters, white, tinged with pink; a luxuriant appearing evergreen, very hardy. Balled, 2 to 3 feet, \$1.25.

Deciduous Ornamental Trees

Acer Dasycarpun. (Soft or Silver Maple.) This variety of maple grows quite readily on the Pacific Coast, and it makes a beautiful, fast growing shade tree, 6 to 8 feet, \$1.00.

Pecan. Makes a splendid shade tree, upright, resembling somewhat the native Black Walnut. See Fruit Dept.

Peach. (Flowering.) Of all the spring flowering trees the double flowering peach are the most brilliant and beautiful. The entire tree and every branch is a mass of blossom, appearing before the leaves, fast growing and very hardy. Double white, pink and red and variegated, 4 to 6 feet, 75c.

SYCAMORE

Elm. (American.) A splendid shade tree, 50 to 75 feet, fully as desirable here as back East. A fast growing, hardy tree, standing drought or dampness equally well. Graceful, arching branches, 5 to 7 feet, 75c.

Ginkgo Biloba. (Maiden Hair Tree.) A very striking, unusual tree 30 to 35 feet, slender while young, spreading with age, foliage shaped like Maiden Hair Fern, but two to three inches across. Usually green color, very bright yellow in Autumn, hardy and very desirable, 4 to 5 feet, \$1.00.

Platanus. (Sycamore.) Hardy, fast growing tree, well suited to Southern California, and growing with little or no water; very large, maple-like leaves, bark, mottled gray and white, 4 to 5 feet, 75c.

Populus. (Poplar.) Fast growing, large tree, slender, erect, columnar poplar often seen along the roadside and driveways. Very rapid growth, 6 to 8 feet, \$1.00.

Chinese Lombardy Poplar. (New.) Grows very compact, erect, leaves round, light green, the long, slender, new growth, a bright red; very desirable, 6 to 7 feet, \$1.25.

Melia. (Umbrella Tree.) Well known compact tree; dense foliage and shade. 3 feet, 60c.

M. Umbraculifera. (Texas Umbrella.) The heavy, evenly branched, splendid shade tree and one of the most useful for planting where shade is desired. 3 to 4 feet, 60c.

Prunus Pissardi. (Purple Leafed Plum.) Round headed upright tree, eventually 18 to 20 feet; foliage deep bronzy purple, color retained throughout the summer; bright red round fruit, showy and good for jelly; makes very striking object amongst surrounding green foliage. 4 to 5 feet, 75c.

Deciduous Shrubs

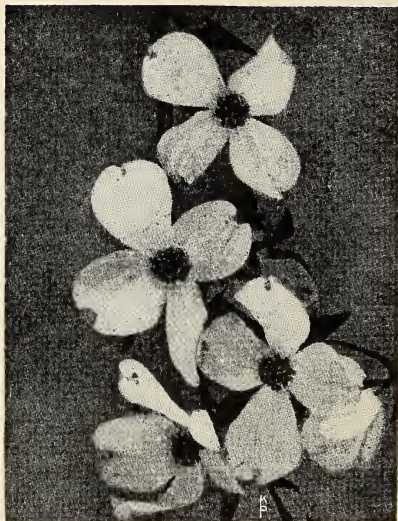

Almond. (Flowering.) A mass of soft, fluffy flowers from top to bottom; blooms very early in the spring before the leaves appear, and in its season the most beautiful object in the garden. Grows 4 to 6 feet; very hardy, double pink, field grown, bare root 2 to 3 feet, \$1.00; double white, field bushy, 1½ to 2 feet, 85c.

Buddleia. (Butterfly Bush.) Fast growing, bushy shrub to 10 feet; remains half evergreen during the winter; blossoms from June to November; long, purple spikes resembling wistaria; very fragrant, one of the very best large shrubs. Balled, 4 to 5 feet, \$1.50.

Cornus Florida. (Flowering Dogwood.) Upright, tree-like, bearing creamy white flowers in the spring before the leaves appear. 2 to 3 feet, 75c.

C. Sanguinea. (Crimson Barked Dogwood.) Spreading shrub, 8 to 10 feet, with purple or dark, blood-red branches; deep green leaves that are hairy on both sides and greenish white flowers in flat topped clusters; berries black. 3 to 4 feet, 75c.

Deutzia Crenata. A group of extremely beautiful and free-blooming shrubs, very hardy and fast growing, growing to 10 feet. Very abundant, frilly, double white flowers in strong spikes and clusters. 2 to 3 feet, 50c.

FLOWERING DOGWOOD

Forsythia Viridissima. (Golden Bell.) One of the earliest blooming shrubs, golden yellow on bare branches; very showy, hardy, height 6 feet. 2 to 3 feet, 60c.

Philadelphus. (Syringa or Mock Orange.) Shrub 6 to 12 feet, very fast growing, covering entire plant in April and May with a sheet of fragrant, saucer-shaped white blossoms; graceful spreading form, exceedingly hardy. 3 to 4 feet, 75c.

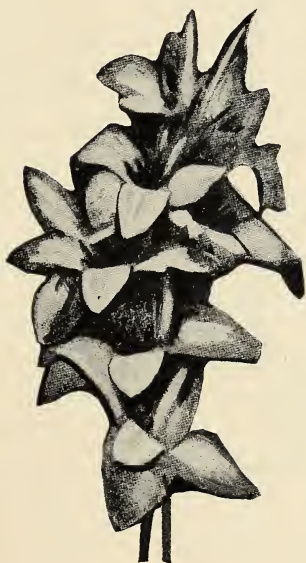

Symphoricarpos Racemosus. (Snowberry.) Bushy shrub 3 to 5 feet high with slender, spreading branches; loose racemes of pinkish flowers in summer are followed by waxy, snow-white berries, 2 to 3 feet, 75c.

D. Pride of Rochester. Same as above, except flowers streaked with red.

S. Vulgaris. (Red Snowberry.) The conspicuous ornamental feature of this plant is the wealth of plump red fruits that are clustered along the arching branches until late winter.

Wygelia Amabilis. The only reason this beautiful shrub is not planted everywhere is because people do not know about it. Bushy, upright form, 6 to 10 feet; beautiful large foliage, masses of trumpet-shaped flowers in delicate tints, flowering for several months. Shaded red and pink, entirely covering the plant. 3 feet, 75c.

Gladioli Available for Season 1925-26

GLADIOLI!

This list of "Gladiolus" are grown in our nurseries. Consequently we know and can assure the purchaser as to strength, type and freedom from all diseases.
